

Software Tester

About Us

TIP Technologies, Inc., based in Pewaukee, WI is the world leader in providing Enterprise Quality Assurance Software. Our Quality Management System (QMS) software offering, **TIPQA™**, is implemented at 6 of the Top 10 US Aerospace and Defense companies. It is specifically designed for the quality requirements of Aerospace, Defense, Medical Devices, and other highly complex manufacturers and regulated industries where quality is mission critical.

TIP Technologies offers a casual and flexible work environment, with exceptional pay and benefits.

Position Summary

TIP Technologies, Inc. has an immediate opening for a full-time Software Tester. This individual will be responsible for the testing of our **TIPQA™** Enterprise Quality Assurance software to ensure that our software meets or exceeds specified standards and end-user requirements.

Responsibilities

- Engage in the manual testing of the **TIPQA™** software product.
- Ensure that testing is thorough and rigorous, and is accomplished with a high degree of accuracy and efficiency.
- Perform duties, as defined below, to validate performance and coded-to-design specifications.

Duties

- Develop and execute manual test plans and manual test cases based on functional specifications.
- Develop and execute automated functional and regression testing, stress and load testing of the application.
- Document, troubleshoot, and isolate problems encountered during testing.
- Work with members of the application development, product management, support, and QA teams to ensure high-quality applications.
- Contribute to the design and architecture of the software products.
- Enter and verify issues in the Defect Tracking system
- Suggest improvements with the automation testing life-cycle in conjunction with Seapine Software testing tools (QA Wizard).
- Assist the Test Team Lead by reviewing, researching and testing complex product application issues.
- Document evolution of testing scripts for future replication.
- Identifies, recommends and implements changes to enhance the effectiveness of quality assurance strategies.
- Performs all other duties as assigned.

Experience

- BS in Computer Science, related field or equivalent experience preferred.
- 2+ years experience in software testing, or quality assurance of software applications.
- 2+ years experience developing test plans/strategies, test cases, and test scripts and traceability process of requirements to test cases.
- Experience with automated testing tools desired.
- Experience with Seapine QA Wizard highly desired.
- Experience planning and estimating testing duration and effort.
- Experience with database verification testing.
- Knowledge and experience with QMS/ERP/MRP systems desired.
- Knowledge and experience with ERP interface (Oracle, Baan, SAP, etc.) desired.
- Load and stress testing experience desired.
- Development and testing in the Microsoft .Net architecture and toolset desired.
- Customer Support experience a plus.

Requirements and Competencies

- Must have a working knowledge of quality assurance methodologies.
- Have a proven track record on the ability to quickly gain detailed understanding of complex applications and their designs.
- Must have the ability to work independently with limited supervision.
- Ability to work both independently and as part of a team and thrive on technical challenges.
- Possess strong analytical skills.
- Demonstrates good problem solving skills in a software test environment
- Capable of establishing goals and priorities with an ability to multi-task.
- Self starter who can handle a high stress fast paced environment
- Excellent oral and written communication skills.
- Ability to establish priorities and multitask
- Dedication to going above and beyond during critical test situations.

Candidates responding to this posting must currently possess the eligibility to work in the United States.

This is a fulltime Salaried Exempt position, with the expectation of 45+ hours per week.
